

NKSalvo - Salvo functionality for the Codan Broadcast NK router range.

Do you have....

- an NK router from Codan Broadcast?
- a need to switch multiple routes with one switch?
- a need to switch multiple levels with one switch?

Then you need **NKSalvo** - Resonant Technologies' custom software application that gives you salvo capabilities on the NK series of routers.

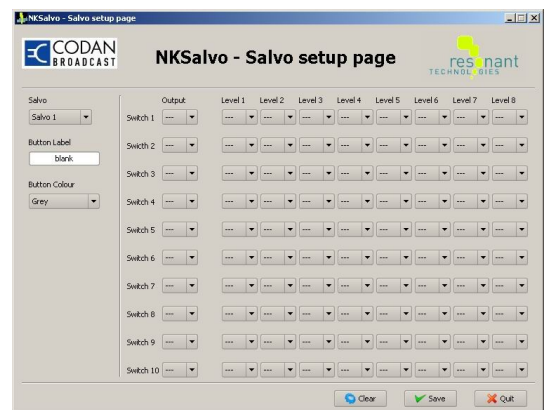

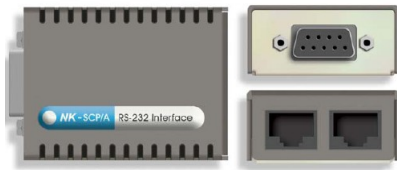

Main Page

NKSalvo stores up to 20 salvos of 10 switches each. Each salvo button can be labelled and the button background colour can be changed.

Some typical applications include:

- Monitor wall switching
- Edit suite switching

NKSalvo uses the Codan Broadcast NK-SCP/A to communicate with the router via RS232.

Setup Page
